LUMINOUS INTENSITY DISTRIBUTION

PROJECTS

By using our 60W LED Stubby Bulb to replace 175W Metal Halide bulb for canopy lighting fixtures, the customer is now able to save a lot per month from his electric bill.

Replace
→

60W LED = 175W MH

Note:

- Don't take the LED lamp apart.
- The LED lamp must work under the right voltage according to the specification.
- Must remove the Ballast,Capacitor,Ignitor before installing our LED Light.

UNIQUE DESIGN

The design of this lamp is very beautiful and Unique, Main Material is used aluminum which is perfect material for thermal conductive to expedite air exchange .

POWER SUPPLY DETAILS

The power supply is built with high quality brand chips ,it has the following advantages:

- Good heat dissipation : pure aluminum structure which is conducive to heat dissipation;
- High efficiency :low power consumption.generate low heating, which can reduce lighting temperature, thereby improving efficiency;
- Temperature protection:when lamp temperature go rising ,power supply can be sensed and automatically ajust power to low temperature ,to enhance the whole lamp lifespan;
- Surging protection :it can suppress surge invasion to protect the lamp from damage.

INSTALLATION

Normally. The traditional lamp has the ballast or capacitor or ignitor, like HPS, MH.

Replace E40/E27 CFL

Replace HPS/MH

When LED Stubby Light installed in enclosed fixture, please make sure fixture diameter big enough for heat dissipation.
